

## 2400 Gallon Dust Tanker

**Client: Quattro (UK) Ltd, London, UK**

London-based Quattro UK Ltd is a multi-disciplined supplier of services to the construction, utilities, building and re-cycling industries with a long list of satisfied clients and customers ranging from residential projects to multi-million pound corporate and municipal contracts across the UK.

Quattro UK have several crushing, recycling and processing sites. The handling process creates significant levels of dust, which can cause health issues for operators and neighbouring residents if not controlled properly.

Their 2400-gallon dust suppression tanker ensures that they comply fully with legislation and implement best practice when it comes to environmental management.

### Design Details

- ✓ 2400 gallon internally baffled tanker with a painted finish to the clients specification.
- ✓ Hydraulically operated road blaster bar for close contact and intense cleaning. It is lifted clear for transport.
- ✓ Rain gun water cannon to accesses and dampen down earth storage clamps up to 70m high.
- ✓ Commercial axle rated to 100km/hr with suspension for safe road transportation
- ✓ 8000 litre Garda pump

*MAJOR tankers are totally reliable. In all the years we have had them, we've had no issues. That's important, because we hire them out a lot throughout the year. They are very simple to operate so suit many of our customers.*

*Each tanker provides us with a multi-functional facility for lots of different jobs. Not only with the rain gun and spinner suppressor, but they also have an integral wash-down facility which we can use on site for our construction equipment. It can be used for clearing muddy roads as well before the sweeper goes in.*

*MAJOR are great engineers and always willing to manufacture something special, built for purpose and built to last.*

**Michael McDermott, Plant Manager, Quattro (UK) Ltd.**
