

SLOPETRAK 500 RADIO CONTROL MOWERS

Overview

Designed especially for tackling tough terrain, the ROBOCUT T500 features a low centre of gravity design and durable rubber tracks that make it an outstanding all-terrain mowing machine, capable of mastering slopes up to 55 degrees whilst enhancing operator safety by removing them from the danger zone.

Power comes from a 48hp, three-cylinder, Perkins diesel engine that uses a DPF filter system to ensure it meets the latest Stage V emissions regulations without the need for Adblue.

KEY FEATURES

- Proven Perkins engine technology - Stage V compliant
- Twin roll-over protection bars
- Fully enclosed, all-metal panels
- Responsive remote control unit with 150m working range
- Innovative low centre-of-gravity design
- Robust build quality
