

SLOPETRAK S300

RADIO CONTROL MOWERS

The Twose SlopeTrak S300 from delivers outstanding performance and mowing efficiency. Featuring a new and powerful Vanguard 28hp engine, low fuel consumption and low emissions, and a hybrid electric drive, this machine delivers smooth operation every time.

The Twose SlopeTrak S300 has low ground pressure creating minimal surface disturbance during operation. The low centre of gravity and wide track widths offer maximum stability and optimum handling whilst working on slopes up to 55°.

Operation of the Slope Trak S300 is made effortless with the fully proportional remote control with a range of 150m and offering precise control and variable speed along with full control of the cutting deck functions including engaging and disengaging and height adjustment.

Some of the other great features include fast-stop rotors (cuts out in 3 seconds), fully enclosed body panels keep grass and debris out, GPS enabled offering the ultimate in mowing efficiency - maximum productivity, improved safety and more efficient working.

Model	Product Code	Cutting Width	Cutting Height	Rotors	Weight	Height	Length	RRP ex GST	RRP incl GST
