

WIEDENMANN SUPER 1300 S

The Wiedenmann SUPER 1300 S is a compact, high-performance sweeper designed for use on sports fields, golf greens, public parks, and residential lawns. It's perfect for efficiently collecting grass clippings, leaves, and other debris.

KEY FEATURES:

Consistent Sweeping: The pick-up head is mounted parallel to the ground, ensuring the sweeping brush stays at a consistent height, even as the hopper fills. It's ideal for uneven terrain.

Overhead Dumping: The standard overhead dump system makes it easy to empty debris into standard containers, with a 170 cm dumping height for efficient unloading.

Easy Mounting: The sweeper attaches to the lower link arms of the tractor's 3-point hitch, ensuring smooth, precise operation behind the towing vehicle.

Large Capacity: With a 1.6 m³ container, you can sweep longer without needing to stop and empty.

Accurate Tracking: The pivot point in front of the machine ensures accurate tracking, making it easy to work close to obstacles like trees and edges.

Standard Build Inclusions:

- **1274013** 2-Point Hitch Attachment with Hose Support
- **1274029** Hydraulic Drive System
- **1272508** Rear Collision Guard with Light Kit
- **1274050** Electronic Fill Level Meter with Digital Display
- **1240385** 3-Pin Electrical Harness for Fill Meter
- **1274023** Low Mount Hitch Below PTO Shaft Stub
