

FIELDQUIP® AG & TURF

RETAIL PRICE LIST

EFFECTIVE - 1ST MARCH 2026

FIELDQUIP[®]

AG & TURF

GLOBAL INNOVATION. LOCAL EXPERTISE.

THE SMART CHOICE FOR PROFESSIONAL TURF MANAGEMENT.

Headquartered in Oakey, Queensland, Fieldquip Ag & Turf is part of the global Alamo Group, a world leader in the design and manufacture of professional agricultural and turf equipment.

We proudly supply and support a diverse range of premium implements across Australia and New Zealand, combining international innovation with local expertise. Our portfolio includes slashing and mowing equipment from 1 to 8 metres wide, along with flail mowers, reach mowers, remote-control mowers, pasture toppers, finishing mowers, and an extensive fine turf range sourced from our trusted international partners.

Since beginning in 2004, Fieldquip Ag & Turf has continued to grow and evolve, driven by a commitment to quality, reliability and customer satisfaction. As part of the Alamo Group since 2014, we are proud to connect our customers with world-class equipment from leading manufacturers in the UK, USA, Germany and beyond, all backed by local service and support they can depend on.

MISSION

To provide reliable, high-quality implements that deliver exceptional value and exceed the expectations of tractor owners, operators and turf professionals throughout Australia and New Zealand.

VISION

For every tractor owner and turf professional in Australia and New Zealand to be the proud owner of at least one Fieldquip implement.

WE TAKE RESPONSIBILITY FOR QUALITY

Quality is at the core of everything we do. From design and sourcing to delivery and support, we are committed to providing durable, high-performing equipment that meets the needs of professionals in the field. Every member of our team takes pride in the quality of their work.

WE DELIVER CUSTOMER SATISFACTION

Our customers are the reason we exist. We listen, we adapt and we deliver, ensuring every product and service reflects our commitment to reliability, affordability and long-term value.

WE PROVIDE LEADERSHIP AS A COMPANY AND AS INDIVIDUALS

Our leadership is built on innovation, experience and collaboration. We value initiative and teamwork, empowering our people to make decisions that improve performance, strengthen relationships and drive continuous improvement.

WE ACT WITH INTEGRITY IN ALL WE DO

Honesty, fairness and respect guide every aspect of our business. We honour our commitments and take responsibility for our actions with customers, suppliers, our team and the broader community.

WE VALUE FIELDQUIP AG & TURF PEOPLE

Our people are our foundation. We foster a culture of respect, trust and opportunity, encouraging growth, learning and collaboration across every part of the business.

WE CONSIDER OUR SUPPLIERS AS VITAL TEAM MEMBERS

Our suppliers are integral to our success. We believe in clear communication, mutual respect and fair partnerships that deliver consistent quality and long-term value for our customers.

FIELDQUIP

SABRE SERIES SLASHERS

SABRE Offsettable Rotary Slashers, a Fieldquip Ag & Turf range, the SABRE series delivers robust, compact slashers for small to mid-range tractors, ideal for pasture topping, property maintenance and general farm work. Built for durability, each model features a galvanised deck, reliable driveline protection and essential safety features.

MODELS & TRACTOR SUITABILITY:

SBR12-1500C / SBR15-500C: 18–40 HP tractors (40 HP gearbox)

SBR18-500C: 30–50 HP tractors (50 HP gearbox)

KEY FEATURES:

- Offsettable design for efficient edge and fence-line cutting
- 5 mm galvanised deck for corrosion resistance and long service life
- Category I linkage with floating top link
- Adjustable skids for consistent cutting height
- 540 RPM PTO, friction clutch fitted (overrun clutch optional)
- Front and rear chain guards for safety
- Gearbox colour options: red or yellow (Please specify when ordering).

Model No.	Overall Width	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST

FIELDQUIP LE SERIES SLASHERS

The Fieldquip Ag & Turf LE Series is a robust, offsettable rotary slasher designed for reliable performance across a wide range of agricultural applications. Featuring an efficient edge and fence-line cutting capability, it is ideal for pasture maintenance, paddock topping and general farm work, offering a strong and dependable build for 30–75 HP tractors.

TRACTOR SUITABILITY:

Suits 30–75 HP tractors (75 HP gearbox)

KEY FEATURES:

- Offsettable design for efficient edge and fence-line cutting
- 5 mm galvanised deck for strength and corrosion resistance
- Category I & II linkage
- Pivoting headstock with chain backstays for stability
- Adjustable skids for consistent cutting height
- 540 RPM PTO, friction clutch fitted (overrun clutch optional)
- Front and rear chain guards for operator safety
- Gearbox colour options: red or yellow (please specify when ordering)

FIELDQUIP XLE SERIES SLASHERS

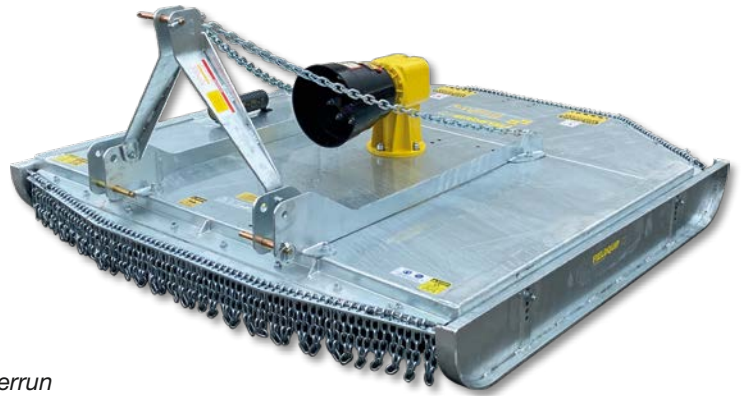

The Fieldquip Ag & Turf XLE Series is a heavy-duty, offsettable galvanised rotary slasher engineered for demanding agricultural conditions. Built for strength, durability and consistent performance, it delivers efficient edge and fence-line cutting while standing up to tougher workloads. Ideal for pasture maintenance, paddock topping and general farm applications, the XLE Series features a strong build and upgraded gearbox suited to larger tractors.

TRACTOR SUITABILITY:

Suits 60–100 HP tractors (100 HP gearbox)

KEY FEATURES:

- Offsettable design for efficient edge and fence-line cutting
- 5 mm galvanised deck for superior strength and corrosion resistance
- Category I & II linkage
- Pivoting headstock with chain backstays for added stability under load
- Adjustable skids for consistent cutting height
- 540 RPM PTO, heavy-duty friction clutch fitted (overrun clutch optional)
- Front and rear chain guards for operator safety
- Gearbox colour options: red or yellow (please specify when ordering)

FIELDQUIP XHD SERIES SLASHERS

The Fieldquip Ag & Turf XHD Series is a heavy-duty galvanised rotary slasher built for high-horsepower tractors and demanding applications. Designed for contractors and large-scale operations, it delivers strength, durability and reliable cutting performance in tough conditions.

MODELS & TRACTOR SUITABILITY:

XHD72C: 50-150 HP Tractors (150 HP gearbox)

XHD84C: 70-150 HP Tractors (150 HP gearbox)

KEY FEATURES:

- 150HP Gearbox with Friction Clutch
- Heavy-duty monocoque pressed galvanised 6mm deck plate
- 540 RPM PTO driveshaft
- Pivoting headstock with chain backstays
- Adjustable height, high-clearance skids
- Heavy-duty spring steel blade carrier
- Heavy-duty swing-back lift blades
- Front and rear chain guards
- Gearbox colour options: red or yellow (Please specify when ordering)
- XHD72C comes standard with one adjustable height castor wheel
- XHD84C comes standard with two adjustable height castor wheels

FIELDQUIP

GEARMOWER SERIES SLASHERS

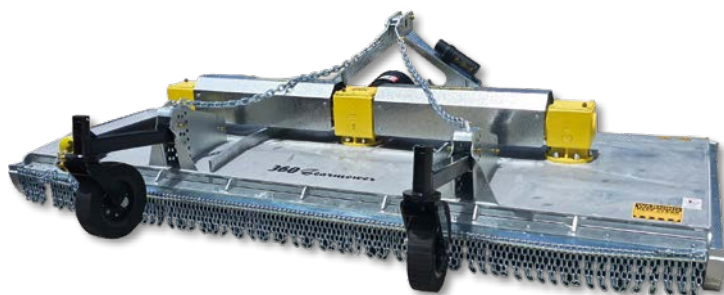

The Fieldquip Gearmower Series Slashers are heavy-duty, three-rotor gear drive rear discharge machines engineered for demanding agricultural and contracting conditions. Built for strength, durability and high-output performance, they deliver smooth, efficient power transfer across all three rotors for consistent results in heavy grass and crop residue applications.

Designed for broadacre pasture management, large-scale topping and commercial slashing, the Gearmower Series features reinforced monocoque deck construction and heavy-duty driveline components suited to higher horsepower tractors.

MODELS & TRACTOR SUITABILITY:

GM30-900: Suits 75 HP to 150 HP+

GM36-900: Suits 100 HP to 150 HP+

KEY FEATURES:

- Gear drive rear discharge design
- Heavy-duty monocoque pressed deck – 6 mm (GM30-900) / 8 mm (GM36-900)
- Category II & III linkage with pivoting headstock and chain backstays
- 540 RPM PTO driveshaft with multi-plate asbestos-free brass impregnated friction clutch
- Extra heavy-duty spring steel laminated blade carrier with swing-back heat-treated lift blades
- Adjustable high-clearance skids and twin heavy-duty adjustable height rear castor wheels
- Clean body lines to minimise grass build-up
- Front and rear chain guards for operator safety
- Gearbox colour options: red or yellow (*please specify when ordering*)
- Proudly manufactured locally in Oakey, Queensland.

MAJOR CYCLONE MOWER WITH WHEELS

The Major Cyclone Mower with Wheels is a heavy-duty rotary slasher/mulcher designed for the toughest environments. Developed through extensive farm trials, it combines durability, reliability, and efficiency with reduced power consumption and maintenance compared with traditional flail mowers.

Its patented 'blender' double-chop blade system requires 25% less HP than a flail mower, slashing at least 25% off upfront fuel costs. Built with Strenx™ 700 MC steel and Hardox® 450 undersole discs, and fully hot-dip galvanised, the Cyclone is tough enough for heavy scrub, stubble management, cover crops, and maintaining field margins.

APPLICATIONS:

Airfields, waterways, crop residue, firebreaks, grass seed production, scrub, orchards, pasture & paddocks

KEY FEATURES:

- Save 25% on power and fuel costs compared to a flail mower
- Low maintenance, fewer wearing parts than a flail mower
- High forward speeds, even cut distribution
- Unique blade system for maximum mulching and shredding
- Even distribution of cut material
- Multi-purpose mower; ideal for heavy scrub, stubble management, cover crops and maintaining field margins for farm biodiversity

The Major Cyclone is the mower of choice for efficient, reliable, and high-performance mulching.

MAJOR CYCLONE MOWER WITH REAR ROLLER

The Major Cyclone with Rear Roller is a heavy-duty rotary mulcher designed for demanding agricultural and land management applications. Its patented 'blender' double-chop blade system requires up to 25% less horsepower than a flail mower, reducing fuel use while delivering a fine, evenly distributed mulch.

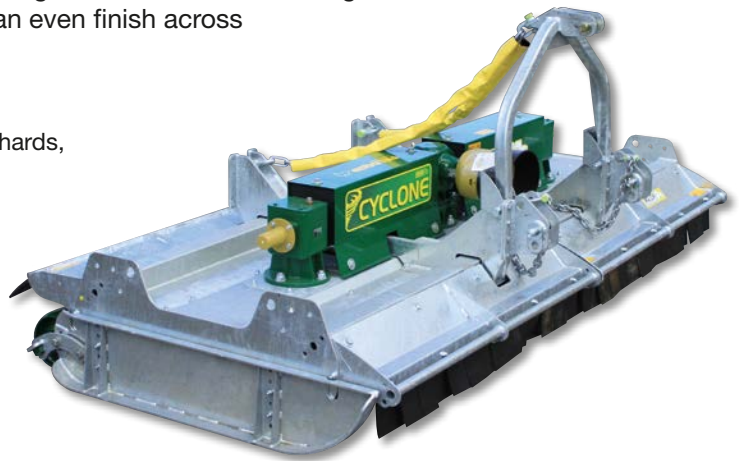

Built from Strenx™ 700 MC structural steel with Hardox® 450 undersole discs and fully hot-dip galvanised, the Cyclone is engineered for long service life in tough conditions. The full-length rear roller ensures consistent cutting height and an even finish across varied terrain.

APPLICATIONS:

Pasture topping, crop residue, cover crops, scrub, orchards, waterways and field margin management.

KEY FEATURES:

- Patented double-chop mulching system
- Up to 25% lower power and fuel use vs flail mowers
- Even material distribution with no windrowing
- Low maintenance with fewer wearing parts
- Heavy-duty rear roller

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST

MAJOR CS PRO COMPACT MOWER

The CS Pro MJ65-150 is a versatile mower for compact tractors (20–40hp), featuring a low-maintenance gearbox driveline for simple, reliable operation. Its unique mulching blade system delivers consistent results in dense vegetation, heavy scrub, hedgerows, turf and stubble, with fewer wearing parts than a flail mower to reduce lifetime maintenance costs.

Manufactured from high-performance Strenx™ 700 MC structural steel and finished in hot-dip galvanising, the MJ65-150 is built for durability, efficiency and long-term value.

KEY FEATURES:

- Hot-dip galvanised finish
- Unique mulching blade system
- Gearbox driveline
- Fewer wearing parts than flail mowers
- Heavy-duty full-length rear roller

Model No.	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST
MJ65-150	1.45m (4' 9")	350kg	20	AU\$15,209	AU\$16,730

SPEARHEAD MULTICUT 420 ROTARY FLEX WING SLASHER

The Spearhead Multicut 420 is a 3-point linkage mounted rotary slasher ideal for tractors from 80hp and above. Positioned perfectly between fixed and trailed mowing units, it offers excellent versatility with a 4.2m cutting width while remaining compact for tighter access areas.

A heavy-duty 100hp driveline operating at 1000rpm powers three rotors, each fitted with three blades running at over 80 metres per second, delivering effortless cutting performance in demanding conditions. The delta-style deck construction promotes smooth material flow, while the heavy-duty floating linkage maintains an even finish across rough terrain.

Four heavy-duty industrial wheels provide stability, with simple pin height adjustment on the wheel arms for quick in-field cutting height changes. Inward folding wings reduce transport width to 2.9m, and as a linkage-mounted unit, no on-road towing kit is required.

Built for strength and longevity, the Multicut 420 features a fully seam-welded 5mm deck plate, full-length skids, heavy-duty updraft blades, anti-scalp dishes, slip clutch protection and a 7-year gearbox warranty.

KEY FEATURES:

- Cutting Width: 4.2m
- Transport Width: 2.9m
- 4 x 100HP (75KW) Rotor Gearboxes
- 1000rpm PTO
- Three rotors with nine blades total
- 80hp+ tractor requirement
- 7-year gearbox warranty

Designed for versatility, stability and high-performance mowing in challenging conditions.

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST
9560629	Heavy Duty Triple Spindle Slasher 1000rpm PTO	4.71m (15' 6")	1875kg	80	AU\$47,736	AU\$52,509

FIELDQUIP

SAMURAI 15 FLEX WING SLASHER

The all-new Samurai 15 from Fieldquip Ag & Turf sets a new standard in pasture mowing. Engineered for performance and efficiency, it delivers fine cutting and semi-mulching power without the high horsepower demand of comparable machines.

Designed to operate with smaller tractors while achieving exceptional results, the Samurai features a unique high-lift blade system with up to 100mm cutting capacity, handling tough terrain while maintaining a clean finish. Its flat-top and underside deck design reduces debris build-up and minimises seed transfer between paddocks for cleaner, more efficient mowing.

Built for durability and productivity, the Samurai 15 combines a user-friendly trailing drawbar, fixed towing eye and folding wings for safe, convenient transport

KEY FEATURES:

- Cutting Width: 4.6m
- Transport Width: 2.7m
- 100mm cutting diameter capacity
- 1 x 250HP (186KW) Splitter Gearbox
- 3 x 165hp (123kW) Rotor Gearboxes
- Designed for efficiency, durability and high performance

When quality, efficiency and ease of use matter, the Samurai 15 delivers.

FIELDQUIP

SAMURAI 20 FLEX WING SLASHER

The all-new Samurai 20 from Fieldquip Ag & Turf sets a new benchmark in high-capacity pasture mowing. Engineered for performance and efficiency, it delivers fine cutting and semi-mulching power without the excessive horsepower demand of comparable machines.

Designed for larger-scale operations, the Samurai 20 features a heavy-duty 5-spindle design and 1000 RPM PTO driveline for superior power transfer and consistent performance across its full working width. Its unique high-lift blade system handles tough terrain up to 100mm cutting capacity while maintaining a clean, even finish. The flat-top and underside deck design reduces debris build-up and minimises seed transfer between paddocks for cleaner, more efficient mowing.

Built for durability and productivity, the Samurai 20 combines robust construction with folding wings for safe, convenient transport between jobs.

KEY FEATURES:

- Cutting Width: 6.5m
- Transport Width: 2.7m
- Heavy-Duty 5 Spindle Design
- 1000 RPM PTO
- 100mm cutting diameter capacity
- 1 x 250HP (186KW) Splitter Gearbox
- 5 x 165hp (123kW) Rotor Gearboxes
- Designed for efficiency, durability and high performance

When scale, strength and efficiency matter, the Samurai 20 delivers.

SPEARHEAD

MULTICUT 480 ECO-LINE FLEX WING SLASHER

The Spearhead Multicut 480 Eco-Line is a high-output trailed rotary flex wing slasher designed to cover large areas quickly and efficiently. Based on the industry-leading Multicut 460 platform, the 480 Eco-Line delivers proven performance with the strength and durability expected for demanding agricultural and commercial applications.

With a 4.6m cutting width, it is popular with farmers, airports and military organisations where productivity and reliability are essential. Nine heavy-duty steel blades provide effective cutting performance across varied terrain, ensuring consistent results in pasture topping and general mowing operations.

A flat topskin, combined with a flat underside deck design, helps prevent debris build-up during operation. This not only improves efficiency but also reduces the risk of transferring unwanted seeds between paddocks or crop areas. The streamlined deck design also contributes to improved energy efficiency.

Mounting is straightforward with a fixed towing eye supplied as standard, while optional swivel and K80 hitch versions are available to suit different towing requirements. Folding wings make transport between sites simple and convenient, improving manoeuvrability and reducing overall travel width.

KEY FEATURES:

- 4.6m cutting width for fast, high-capacity mowing
- Nine heavy-duty steel blades
- Flat topskin and underside to minimise debris build-up
- Reduced risk of seed transfer between areas
- Fixed towing eye as standard
- Folding wings for easy transport
- 1 x 250HP (186KW) Splitter Gearbox
- 3 x 165hp (123kW) Rotor Gearboxes

Built for productivity, durability and ease of use, the Multicut 480 Eco-Line delivers efficient mowing performance across large-scale operations.

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST
9948010	Heavy Duty Triple Spindle Slasher 1000rpm PTO ECO-LINE	4.79m (15' 9")	2690kg	70	AU\$70,668	AU\$77,734

SPEARHEAD

MULTICUT 650 PRO-LINE FLEX WING SLASHER

The Spearhead Multicut 650 Pro-Line is a heavy-duty 6.2m flex wing slasher built for serious acreage and high work rates. Designed for broadacre pasture topping, stubble management and farm maintenance, it delivers fast, consistent output in tough conditions.

Five rotors fitted with Spearhead's six-blade Starcut system (30 heavy-duty blades in total) provide an exceptionally fine chop from grass through to light scrub. The even spread across the full cutting width leaves a clean finish, outperforming comparable three-rotor machines.

A heavy-duty driveline with a 250hp input gearbox and high-capacity rotor gearboxes ensures reliable power transfer, all protected by slip clutches for durability in demanding work. Hydragas suspension, built-in shock absorbers and a walking axle improve stability and reduce ground pressure, while wide industrial tyres provide better flotation across uneven ground. Hydraulic wing lift and mechanical wing float allow the mower to follow contours, and folding wings reduce transport width to 2.8m for safer road travel.

Built to handle hard use, the 650 Pro-Line features a reinforced smooth deck, full-length side skids, anti-scalp dishes, full-width safety chains, integrated seal protection and a rear lighting kit. A 7-year gearbox warranty backs its long-term reliability.

KEY FEATURES:

- Cutting Width: 6.2m
- Transport Width: 2.8m
- Five rotors with 30 heavy-duty blades
- 250hp input gearbox
- Slip clutch protection
- Hydragas suspension with walking axle
- 7-year gearbox warranty
- 1 x 250HP (186KW) Splitter Gearbox
- 5 x 165hp (123kW) Rotor Gearboxes

Built for high hectares per hour, durability and dependable performance.

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST
9965002	Heavy Duty 5 Spindle Slasher 1000rpm PTO PRO-LINE	6.47m (21' 3")	3300kg	90	AU\$92,456	AU\$101,701

SPEARHEAD

MULTICUT 830 PRO-LINE FLEX WING SLASHER

The Spearhead Multicut 830 Pro-Line is a heavy-duty 8.26m flex wing rotary slasher built for maximum output and serious broadacre work. Designed for large-scale pasture topping, stubble management and high-hectare contract applications, it delivers exceptional productivity in demanding Australian conditions.

Five rotors fitted with Spearhead's six-blade Starcut system (30 heavy-duty winged blades in total) provide an extremely fine chop from heavy grass through to light scrub. The even spread across the full cutting width ensures a clean, consistent finish, making it ideal for operators targeting 100+ hectares per day.

A premium driveline featuring a 250hp splitter gearbox and high-capacity rotor gearboxes (rated from 165hp), all protected by slip clutches, ensures reliable and even power transfer across the machine. Hydragas suspension and a full-width walking axle system reduce shock loading and improve stability, while eight large implement tyres provide excellent flotation and ground contour following. Hydraulic wing lift and mechanical wing float allow the mower to track undulating country, with folding wings reducing transport width for safer road travel.

Built for long-term durability, the 830 Pro-Line features a reinforced smooth-top deck to prevent debris build-up, full-length side skids, anti-scalp dishes, full-width front and rear safety chains, integrated seal protection, premium long-life driveshafts and an LED lighting kit. A 7-year gearbox warranty underlines its strength and reliability.

KEY FEATURES:

- Cutting Width: 8.06m (26' 5" * Five rotors with 30 heavy-duty Starcut blades
- 1 x 250HP (186KW) Splitter Gearbox
- 5 x 165hp (123kW) Rotor Gearboxes
- Hydragas suspension with full-width walking axles
- 8 rear implement tyres
- 7-year gearbox warranty

Built for maximum hectares per hour, strength and dependable large-scale performance.

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST
9983002	Heavy Duty 5 Spindle Slasher 1000rpm PTO PRO-LINE	8.26m (27' 1")	4800kg	150	AU\$120,958	AU\$133,054

MAJOR CONTOURA FINISHING MOWER

The MAJOR Contoura is a heavy-duty, multi-deck mower designed to deliver a consistent, high-quality finish on undulating and challenging terrain. Suitable for tractors from 35hp and above, it is ideal for golf fairways and rough, sports grounds and large turf areas where presentation matters.

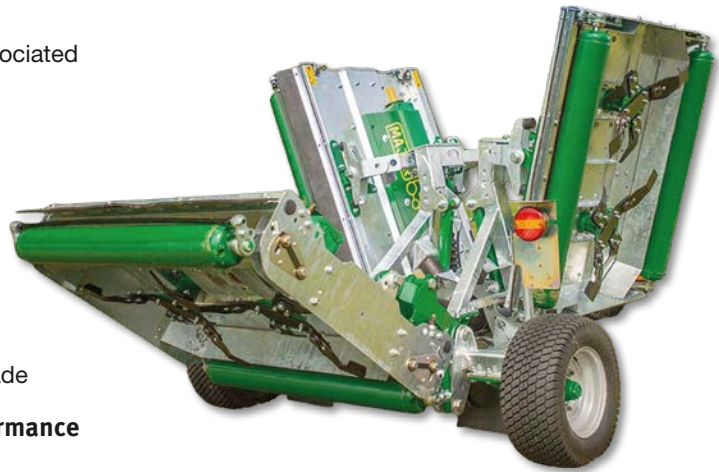

A unique multi-pivoting frame with self-aligning spherical bearings allows the three mowing decks to closely follow ground contours, ensuring an even cut across hilly or uneven ground. Full-width rollers maintain a consistent height and produce a professional striped finish, while zero-turn capability enables tight manoeuvring around obstacles without turf damage.

Powered by a gear-driven driveline, the Contoura eliminates the issues associated with belt-driven systems and maintains high blade tip speeds for efficient cutting in dense grass. Cutting height is easily adjustable from 10–110mm to suit a range of turf applications.

Manufactured from Strenx™ 700 MC high-strength steel and fully galvanised for corrosion protection, the Contoura is built for long-term durability. The Series 2 model features 5mm boron steel blades, with a simple adjustment allowing conversion from rigid to swinging blade configuration.

KEY FEATURES:

- Unique pivoting frame with self-aligning spherical bearings allow the mowing decks to follow the ground contours with ease
- Fully galvanised finish for even longer machine life
- Gear-driven drive line, eliminates the problems associated with belt-driven mowers
- Cutting height range: 10–110mm
- Zero-turn capability
- Even distribution of cut material
- Full width rollers follow undulations to give a consistent cut, even in the most challenging terrains
- Two blade systems in one; a simple adjustment converts the blade from rigid blade to swinging blade

Built for durability, precision and consistent performance on uneven terrain.

MAJOR CENTRE MOUNTED GRASS TOPPER

The MAJOR Centre Mounted Grass Topper is a fully gear-driven machine designed for efficient pasture topping and general farm maintenance. Built for reliability and consistent performance, it features high-speed rotors fitted with a twin-cut swinging mulching blade system for effective grass control and even material distribution. The MJ55-270 model is a heavier-duty version, equipped with extra heavy-duty gearboxes for demanding conditions.

With no belts or pulleys, the gear-driven transmission reduces maintenance and improves long-term durability. Rubber shock absorbers positioned between the rotor gearboxes help absorb impact loads, protecting the driveline during operation. A galvanised finish comes standard for corrosion resistance and extended service life.

KEY FEATURES:

- Working Width: 2.7m (9')
- PTO Speed: 1000 RPM
- Fully gear-driven transmission
- Twin-cut swinging mulching blade system
- *Four blades per rotor
- Heavy-duty gearboxes with rubber shock absorbers
- Low maintenance – no belts or pulleys
- Galvanised finish as standard

Built for strength, simplicity and reliable pasture management.

Model No.	Description	Working Width	Weight	HP (Min.)	RRP ex GST	RRP inc GST
909-HD	MJ55-270 Centre Mount Pasture Topper 2.7m - Standard Galvanised finish	2.7m (9')	560kg (640kg with wheels)	50	AU\$18,888	AU\$20,777

MAJOR FLEX WING GRASS TOPPER

The MAJOR Flex Wing Grass Topper is a heavy-duty three-point linkage mounted machine designed for efficient pasture topping and large-scale grass maintenance. Folding to a compact 2.3m (7'6") transport width, it provides convenient transport between properties while maintaining a wide 5.40m (18') working width for maximum productivity.

Built to MAJOR's renowned robust standards, the Flex Wing Topper features hydraulically operated wings that raise easily into transport position. During operation, the wings flex from -15° to +25°, allowing the machine to closely follow ground contours for a consistent and even finish across undulating terrain.

Contra-rotating ProCut swinging blades are retained in hardened steel bushings and secured with sprung steel blade backs for durability and reliable performance. Under-sole discs prevent scalping and help deliver a clean, professional cut, while an 88mm (3½") blade overlap eliminates striping. A galvanised finish comes standard for corrosion resistance and extended service life.

KEY FEATURES:

- Working Width: 5.40m (18')
- Transport Width: 2.3m (7'6")
- PTO Speed: 1000 RPM
- Hydraulic wing lift
- Wing flex range: -15° to +25°
- ProCut swinging blades
- 88mm (3½") blade overlap
- Slip clutch PTO protection
- Robust pivot points with rubber shock absorbers
- Galvanised finish as standard

Built for strength, flexibility and high-output pasture management.

MAJOR RIGID DECK ROLLER MOWERS

The MAJOR Swift Rigid Deck Roller Mower (MJ71-190 & MJ71-240) is a heavy-duty, gear-driven mower designed for everyday use where a durable and reliable machine is required. Built for precision and consistent performance, it delivers a professional cylinder mower finish every time, even in challenging conditions.

With a fully gear-driven transmission, the Swift mower avoids the issues associated with belt-driven machines, reducing maintenance and improving long-term durability. Sealed internal roller bearings protect against moisture, soil and debris, while full-width rollers follow ground contours to prevent scalping and produce a consistent striped finish. Strenx™ 700 MC high-strength steel is used throughout, with a galvanised finish for corrosion resistance and extended service life.

KEY FEATURES:

- PTO Speed: 540 RPM
- Fully gear-driven transmission
- Two blade systems in one: a simple adjustment converts the blade from rigid blade to swinging blade
- Cutting height: 10–130mm
- 75mm blade overlap for an impeccable finish
- Sealed internal roller bearings
- Full-width rollers to follow ground contours

Built for reliability, durability and superior turf management.

MAJOR WINGED ROLLER MOWER

(THREE POINT LINKAGE)

The MAJOR Swift Winged Roller Mower is a three-point linkage machine designed to deliver a professional, striped finish with ease. Built for reliability and precision, it provides exceptional after-cut appearance across a wide range of conditions. The three-point linkage system ensures close attachment to the tractor for easier towing and safer road transport.

With a 60mm blade overlap and high blade tip speeds, the Swift Winged Roller Mower consistently produces a clean, even cut. The versatile two-in-one blade system allows a simple adjustment from rigid blades to swinging blades, making it suitable for a variety of mowing tasks throughout the year.

Constructed from Strenx™ 700 MC high-performance steel and hot-dip galvanised, this mower is built to last, offering extended lifespan. The hydraulically operated wings fold up to a compact 1.90m (6' 3") transport width.

KEY FEATURES:

- Three-point linkage mounting
- PTO Speed: 540 RPM
- Two blade systems in one: a simple adjustment converts the blade from rigid blade to swinging blade
- Cutting height: 10–130mm
- 60mm blade overlap for a pristine finish
- Sealed internal roller bearings
- Full-length rollers follow ground contours Strenx™ 700 MC galvanised steel construction
- Hydraulically folding wings – fold up for 1.90m (6' 3") transport width

Built for durability, precision and superior turf management, the Swift Winged Roller Mower ensures every cut leaves a professional finish.

MAJOR WINGED ROLLER MOWER (TRAILED)

The MAJOR Swift Trailed Winged Roller Mower is a robust, wide-area mower built for contractors, turf farms and local authorities managing extensive grass areas. Designed for both performance and safety, it combines professional cutting quality with secure, easy transport between sites.

Constructed from high-performance Strenx™ 700 MC structural steel and hot-dip galvanised, this trailed mower is lightweight yet exceptionally strong, delivering long service life. Full-width rollers follow the ground contours to prevent scalping and produce a clean, striped finish every time.

The versatile two-in-one blade system allows a simple adjustment from rigid to swinging blades for effective year-round mowing. Cutting height can be easily adjusted from 10–130mm to suit different conditions. A gear-driven power line ensures low maintenance and reliable performance, while sealed internal roller bearings protect against moisture, soil and debris.

For safe and legal road transport, the mower comes fully braked and includes a LED road lighting kit as standard.

KEY FEATURES:

- Trailed winged design
- Two-in-one blade system – rigid or swinging
- Cutting height: 10–130mm
- Gear-driven power line for low maintenance
- Sealed internal roller bearings
- Strenx™ 700 MC galvanised steel construction
LED road lighting kit and fully braked for safe transport

Built for strength, efficiency and professional grass management across large areas, the Swift Trailed Winged Roller Mower delivers outstanding results with minimal effort.

MAJOR MR FINISHING MOWER

The MAJOR MR Finishing Mower is designed to deliver a high-quality finish across large lawns, estates, parks, golf courses and municipal areas. Built for efficiency and ease of use, it connects quickly to the tractor's three-point linkage, allowing the machine to be ready for operation within minutes.

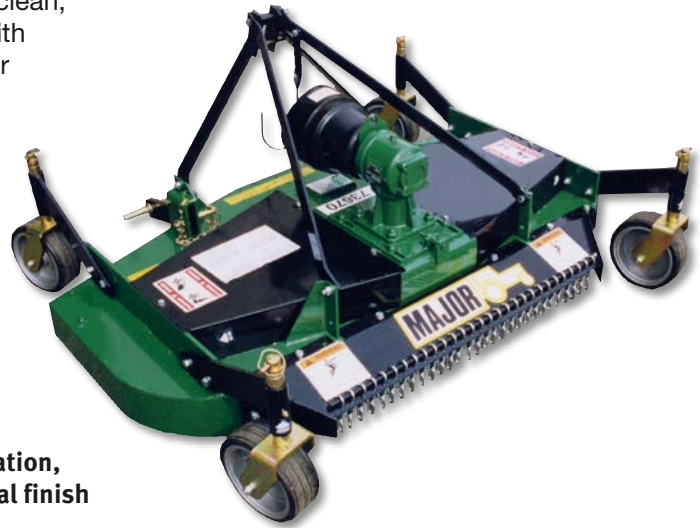

Engineered with operator safety in mind, all maintenance points are positioned on top of the machine to minimise risk and improve accessibility. The four pivoting castor wheels are easily adjusted without tools and can be set precisely to prevent scalping, ensuring a smooth and even finish across varying terrain.

Overlapping blades rotate within individual aerofoils to create a powerful vacuum effect, lifting flattened grass for a clean, professional cut. A twin-belt transmission system with integrated tensioner provides smooth power transfer and reliable performance.

KEY FEATURES:

- Three-point linkage mounting
- PTO Speed: 540 RPM
- Overlapping blades
- Adjustable working depth
- Two belt transmission with tensioner
- Four pivoting rubber wheels

Built for precision, safety and consistent turf presentation, the MAJOR MR Finishing Mower delivers a professional finish across a wide range of applications

MAJOR MJ27 GREEN BEE FLAIL COLLECTORS

The MAJOR MJ27 Green Bee Flail Collectors (MJ27-160 and MJ27-180) are medium-duty, multi-purpose machines designed to deliver efficient cut-and-collect performance across a wide range of applications. Combining mowing, scarifying, collecting, chopping and rolling in a single pass, the Green Bee maximises productivity while maintaining a superior finish.

Available in two working widths – 1.6m and 1.8m – the MJ27 Green Bee is ideal for sports grounds, golf courses, paddock maintenance, airports and airfields, campsites, public open spaces and private estates. The 2.0m³ collection hopper ensures high-capacity operation, while the 2.2m hydraulic high-tip discharge allows for fast and efficient emptying into skips or trucks.

Heavy-duty flail blades are supplied as standard, delivering reliable performance in demanding conditions. An optional scarifying kit is available, enabling aeration and surface renovation in the same pass.

Designed for year-round reliability and versatility, MAJOR Flail Collectors are built to handle everything from formal turf maintenance to clearing overgrown vegetation and supporting biodiversity programs. They are equally effective for leaf collection, hedge trimmings and general debris removal, making them an essential professional solution for comprehensive turf and landscape management.

MAJOR MJ2000 HEAVY DUTY FLAIL COLLECTOR

The MAJOR MJ2000 Heavy Duty Flail Collector is purpose-built for professional, large-scale green space maintenance. Featuring a 2.0m working width and a high-capacity 3.0m³ collection hopper, the MJ2000 delivers maximum productivity and efficiency in demanding environments.

Engineered with a robust construction, the MJ2000 is designed to perform in challenging conditions including scrubland and areas covered in lantana, blackberry and dense woody weeds, while still capable of producing a clean, fine finish in standard turf applications. This versatility makes it ideal for contractors, councils, estates and large property managers requiring a dependable cut-and-collect solution.

The floating linkage system allows the machine to closely follow ground contours, even across uneven or punishing terrain, ensuring consistent cutting performance and a quality finish. A simple hydraulic high-lift function enables the 3.0m³ hopper to tip at 2.1m, allowing for fast and efficient emptying into trailers or skips.

Fitted with BKT turf tyres to minimise ground compaction, the MJ2000 is suitable for use with large compact and agricultural tractors, making it a powerful and reliable choice for intensive vegetation management and turf maintenance operations.

MAJOR OSM-VERGE MOWER

The MAJOR OSM-Verge Mower is a heavy-duty offset mower designed for professional verge, roadside and embankment maintenance. Built for durability and precision in demanding conditions, it features a hydraulic headstock with 140° movement and a hydraulic arm operating from 95° to -35°, allowing operators to cut verges, ditches, embankments, shrubs and light tree growth with confidence.

With up to 1.56m offset capability, it provides excellent reach around fences, buildings and under trees without compromising stability or finish. A full-length rear roller follows ground contours for a consistent cut, with adjustable cutting heights from 15–100mm.

Manufactured from high-performance Strenx™ 700MC structural steel and fully galvanised for corrosion resistance, the OSM-Verge Mower is fuel efficient, low maintenance and requires fewer wearing parts than a comparable flail mower. Available in 1.4m and 2.19m working widths (left-hand configuration stocked).

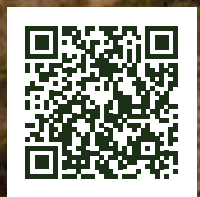

KEY FEATURES:

- Unique blade system for extreme cutting and protection. In the event of hitting an obstacle, the blades retract upwards out of the line of impact, preventing breakages and damage to gearboxes and driveline.
- Hydraulic arm operates from 95° to -35°.
- Internal double roller bearing housing supports the full-length roller while cutting and protects bearings.
- Heavy-duty gearboxes with inter-gearbox shock loading protection to safeguard the machine in the event of a collision.
- Rubber skirting to reduce flying debris.
- Available in left- or right-hand configurations (*LH stocked*).
- Fuel efficient, low maintenance design with fewer wearing parts than a flail mower.

Built for strength, protection and precision cutting, the MAJOR OSM-Verge Mower delivers professional results in the toughest verge and embankment conditions.

SPEARHEAD OUTFRONT FLAIL MOWER

The Spearhead Outfront Flail Mower is a compact, high-performance front-mounted mower designed for councils and contractors requiring reliability, versatility and a superior finish.

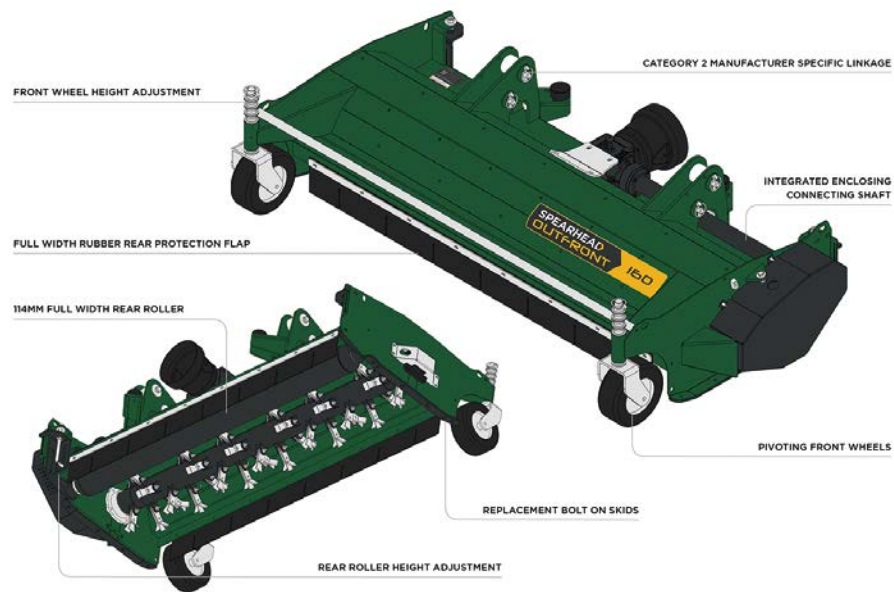

Featuring a spiral rotor design and heavy-duty hammer flails as standard, the Outfront delivers a consistent, high-quality cut in material up to 30mm in diameter. Available in a 1.6m cutting width, the machine ensures efficient coverage while maintaining excellent finish quality. A 4½” rear roller further enhances cut consistency and ground contouring.

A robust three-belt drive transmission provides dependable power transfer, while easily adjustable cutting height and front guide wheels improve operator control and ease of use. Built for durability and all-day performance, the Spearhead Outfront Flail Mower is a reliable solution for demanding municipal and contractor applications.

Built to integrate seamlessly with leading front mower carriers via a two-point linkage system, the Outfront provides adaptable fitment for widely used municipal platforms.

RHINO

REBEL SERIES ROTARY TILLERS

The Rhino Rebel Series Rotary Tillers combine state-of-the-art design with heavy-duty construction to deliver reliable soil preparation across a range of applications. Available in multiple working widths, tine rotation is standard (forward rotation), providing strong soil penetration and a consistent, professional finish.

Each rotor flange is fitted with six hardened "L" shaped blades for effective mixing and tilth. Built for durability, the Rebel Series features continuously welded hitch points, 1/2" steel end plates and a robust cast iron gearbox housing. Slip-clutch driveline protection comes standard to reduce shock loads and minimise downtime, while reverse models include a metal debris deflector for added protection.

HITCH COMPATIBILITY:

- CAT 1 Standard and Quick Hitch (5 ft & 6 ft models)
- CAT 1 & 2 Standard and Quick Hitch (7 ft model)

TERMS & CONDITIONS...

1. All prices and specifications are subject to renewal or alteration without prior notification. Dealers must check prices to satisfy themselves before quoting.
2. Prices are in Australian dollars with both GST inclusive and exclusive.
3. Prices exclude freight except where stated otherwise.
4. It is the dealer's responsibility to check availability of stock before quoting any model or machine for resale.
5. Specifications contained in this pricelist are only an outline. Please consult model specific brochures for complete specifications.
6. Exclusive Dealer Marketing Rights may apply to some products in some areas. It is the dealer's responsibility to check this before quoting any goods for resale.
7. Fieldquip reserves the right not to sell any or all the items included in this pricelist to any potential Purchaser or Reseller.
3. The following items are not covered by Fieldquip warranty;
 - i. Power take-off shafts and clutches,
 - ii. Blades, tynes, flails, knives, tyres, wheels, belts, bearings, seals etc,
 - iii. Freight costs;
 - iv. Loss of income from the machine due to a warranty fault,
 - v. Use of non genuine parts.
4. Fieldquip will not cover any repairs performed without Fieldquip personnel prior agreement.

WARRANTY PROCEDURE

In the event of a product failure please proceed as follows:

5. Phone Fieldquip (07) 4691 1500 and discuss the problem with the customer service team. They will advise how to carry out the repair in the quickest, most effective and efficient way.
6. Advise Fieldquip during this phone call what labour would be involved in the repair work. Fieldquip will authorise the pre-allocated labour allowance for the repair and issue a warranty claim number. No repair is to be commenced without prior authorisation.
7. Fieldquip will post out a warranty claim form. This will specify the allowed labour rate, time allocation and parts to be returned for warranty assessment.
8. Fieldquip will dispatch if needed any parts to carry out the repair work and will invoice and charge the dealer. The faulty parts must be returned for a credit to be raised.
9. Fill out the required forms and return (with faulty parts).
10. Once parts and claim forms are received, parts will be assessed and if the claim is accepted, it will be credited to your account.
11. Claims must be returned within 20 days from date of repair.

WARRANTY TERMS

1. All Fieldquip machinery is covered by a comprehensive warranty against faulty materials and workmanship provided that:
 - i. The machine is operated in normal use,
 - ii. The machine is correctly serviced and maintained,
 - iii. The machine is worked within its stated capacity (ie. horsepower limit and PTO speed),
 - iv. The machine is not subjected to any modifications or damage from improper use
 - v. Fieldquip is in receipt of duly signed pre-delivery and installation certificate and warranty documentation.
2. The term of warranty shall be 12 months from date of installation except machines sold into the Hire Industry, these shall be void of warranty.

NOTE: All photos are for Illustration Purposes only and may be a different model to description.
