

GKB DEEP-CLEAN

Thorough cleaning of synthetic surfaces is essential for protecting turf longevity and ensuring player safety. The tractor-mounted GKB Deep-Clean lifts infill, removes dirt and contaminants, and returns clean infill to the surface, restoring both playability and appearance on tennis courts, football pitches, and other artificial surfaces.

Applications: Artificial Turf

The Deep-Clean is compatible with 3, 5, or 8 mm sieves, making it suitable for any artificial grass type. Designed with speed, reliability, quality of finish, and cost-effectiveness in mind, it combines practical engineering with GKB's renowned build quality.

Addressing concerns about microplastics, the Deep-Clean separates larger debris via its vibrating sieve and uses a vacuum and squeegee system to capture even very small plastic particles, which are collected in a dust bag for easy disposal or replacement.

KEY FEATURES:

- **Linkage:** Three-point linkage Cat I - II

Model No.	Description	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST
