

# GKB BRUSH

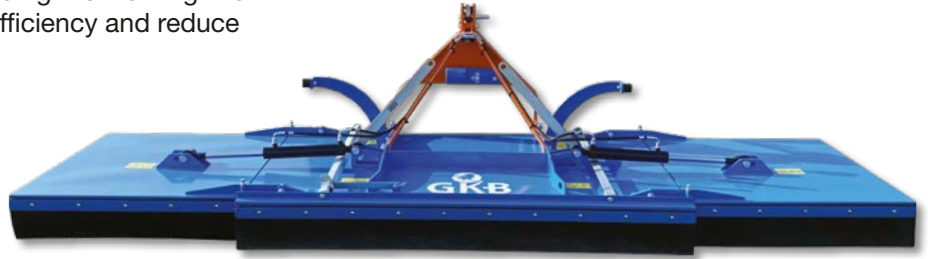

Regular surface brushing is essential to maintaining the playability and visual characteristics of synthetic turf surfaces.

**Applications: Golf Course, Artificial Turf**

The Brush features a 200 cm (79") wide frame fitted with rigid brushes, designed to ensure optimal redistribution of infill material. As standard, the unit includes two additional side decks, expanding the working width up to 400 cm (157") to improve efficiency and reduce operating time.

These side decks are hydraulically folded, allowing for easy transport between pitches and convenient storage once the job is complete.

Model No.	Description	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST
BR400	Brush 4.0m	400 cm / 158"	400kg	35	AU\$15,420	AU\$16,962

# GKB QUICK-BRUSH

The GKB Quick-Brush is the ideal solution for regular maintenance of synthetic turf surfaces, helping to retain the visual appearance and play characteristics of football fields, tennis courts and artificial hockey pitches.

**Applications: Artificial Turf**

Regular brushing prevents infill compaction, ensuring the surface continues to drain effectively, play consistently and maintain a high-quality finish. It is one of the simplest and most effective ways to protect your facility investment and keep your pitch performing at its best.

Designed for ease of use, the Quick-Brush features a simple, no-hydraulic design, allowing it to be used with almost any tractor. It connects quickly and easily via a standard three-point linkage, making it a practical and efficient solution for ongoing turf maintenance.

Model No.	Description	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST
QB200	Quick-Brush 2.0m	200 cm / 79"	120kg	25	AU\$6,539	AU\$7,193
