

GKB VCOLLECTOR

The GKB Vcollector is designed to effectively remove organic matter, control black layer and manage weeds without the use of pesticides. Ideal for maintaining healthy sports turf, it helps prevent the emergence of annual meadow grass while improving overall surface condition.

Suitable for golf courses, cricket fields and winter sports pitches, the Vcollector is built to follow ground contours, delivering consistent scarification while leaving the surface clean and ready for play.

The machine features GKB's unique CombiRotor, which rotates against the direction of travel for a precise and effective cutting action. Heavy-duty 3 mm steel blades cut through dense thatch and roots at working depths of up to 5 cm. With operating speeds of up to 12 km/h, a full sports pitch can be scarified quickly and efficiently. Three-point linkage allows easy attachment to tractors from 35 hp (1.2m model) or 40 hp (1.6m model).

Model No.	Description	Working Width	Weight	Tractor HP (Min.)	RRP ex GST	RRP inc GST
VC120	Vcollector 1.2m	120cm / 48"	560kg	35	AU\$37,866	AU\$41,653
VC160	Vcollector 1.6m	160cm / 63"	620kg	40	AU\$44,112	AU\$48,523
