

MAJOR MR FINISHING MOWER

The MAJOR MR Finishing Mower is designed to deliver a high-quality finish across large lawns, estates, parks, golf courses and municipal areas. Built for efficiency and ease of use, it connects quickly to the tractor's three-point linkage, allowing the machine to be ready for operation within minutes.

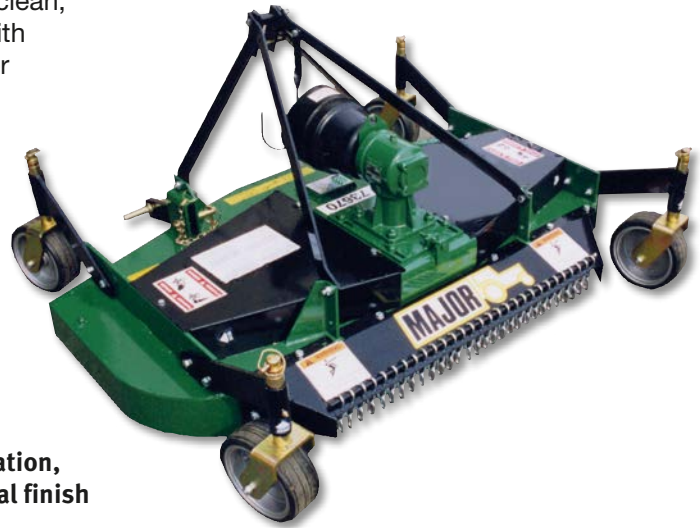

Engineered with operator safety in mind, all maintenance points are positioned on top of the machine to minimise risk and improve accessibility. The four pivoting castor wheels are easily adjusted without tools and can be set precisely to prevent scalping, ensuring a smooth and even finish across varying terrain.

Overlapping blades rotate within individual aerofoils to create a powerful vacuum effect, lifting flattened grass for a clean, professional cut. A twin-belt transmission system with integrated tensioner provides smooth power transfer and reliable performance.

KEY FEATURES:

- Three-point linkage mounting
- PTO Speed: 540 RPM
- Overlapping blades
- Adjustable working depth
- Two belt transmission with tensioner
- Four pivoting rubber wheels

Built for precision, safety and consistent turf presentation, the MAJOR MR Finishing Mower delivers a professional finish across a wide range of applications
