

SPEARHEAD MULTICUT 420 ROTARY FLEX WING SLASHER

The Spearhead Multicut 420 is a 3-point linkage mounted rotary slasher ideal for tractors from 80hp and above. Positioned perfectly between fixed and trailed mowing units, it offers excellent versatility with a 4.2m cutting width while remaining compact for tighter access areas.

A heavy-duty 100hp driveline operating at 1000rpm powers three rotors, each fitted with three blades running at over 80 metres per second, delivering effortless cutting performance in demanding conditions. The delta-style deck construction promotes smooth material flow, while the heavy-duty floating linkage maintains an even finish across rough terrain.

Four heavy-duty industrial wheels provide stability, with simple pin height adjustment on the wheel arms for quick in-field cutting height changes. Inward folding wings reduce transport width to 2.9m, and as a linkage-mounted unit, no on-road towing kit is required.

Built for strength and longevity, the Multicut 420 features a fully seam-welded 5mm deck plate, full-length skids, heavy-duty updraft blades, anti-scalp dishes, slip clutch protection and a 7-year gearbox warranty.

KEY FEATURES:

- Cutting Width: 4.2m
- Transport Width: 2.9m
- 4 x 100HP (75KW) Rotor Gearboxes
- 1000rpm PTO
- Three rotors with nine blades total
- 80hp+ tractor requirement
- 7-year gearbox warranty

Designed for versatility, stability and high-performance mowing in challenging conditions.
