OFFSET (400MM)

The Sniper flail mower is designed for agricultural and municipal use giving a high quality and consistent cut in material up to 40mm. It is the perfect choice for maintenance of farmland and pasture areas.

This robust machine features heavy-duty hammer flails fitted on an electronically balanced rotor mounted on enclosed, self-aligning bearings. Belt drive gives reliable power transmission and a 140mm full width adjustable, self-cleaning rear roller with scraper will ensure a quality cut and well distributed finish.

The Sniper range is available in a choice of working widths between 1.9 and 2.7 metres with operating flexibility offered by a 400mm hydraulic side shift that allows work around trees and other obstructions.
