ARMY MASTER 530

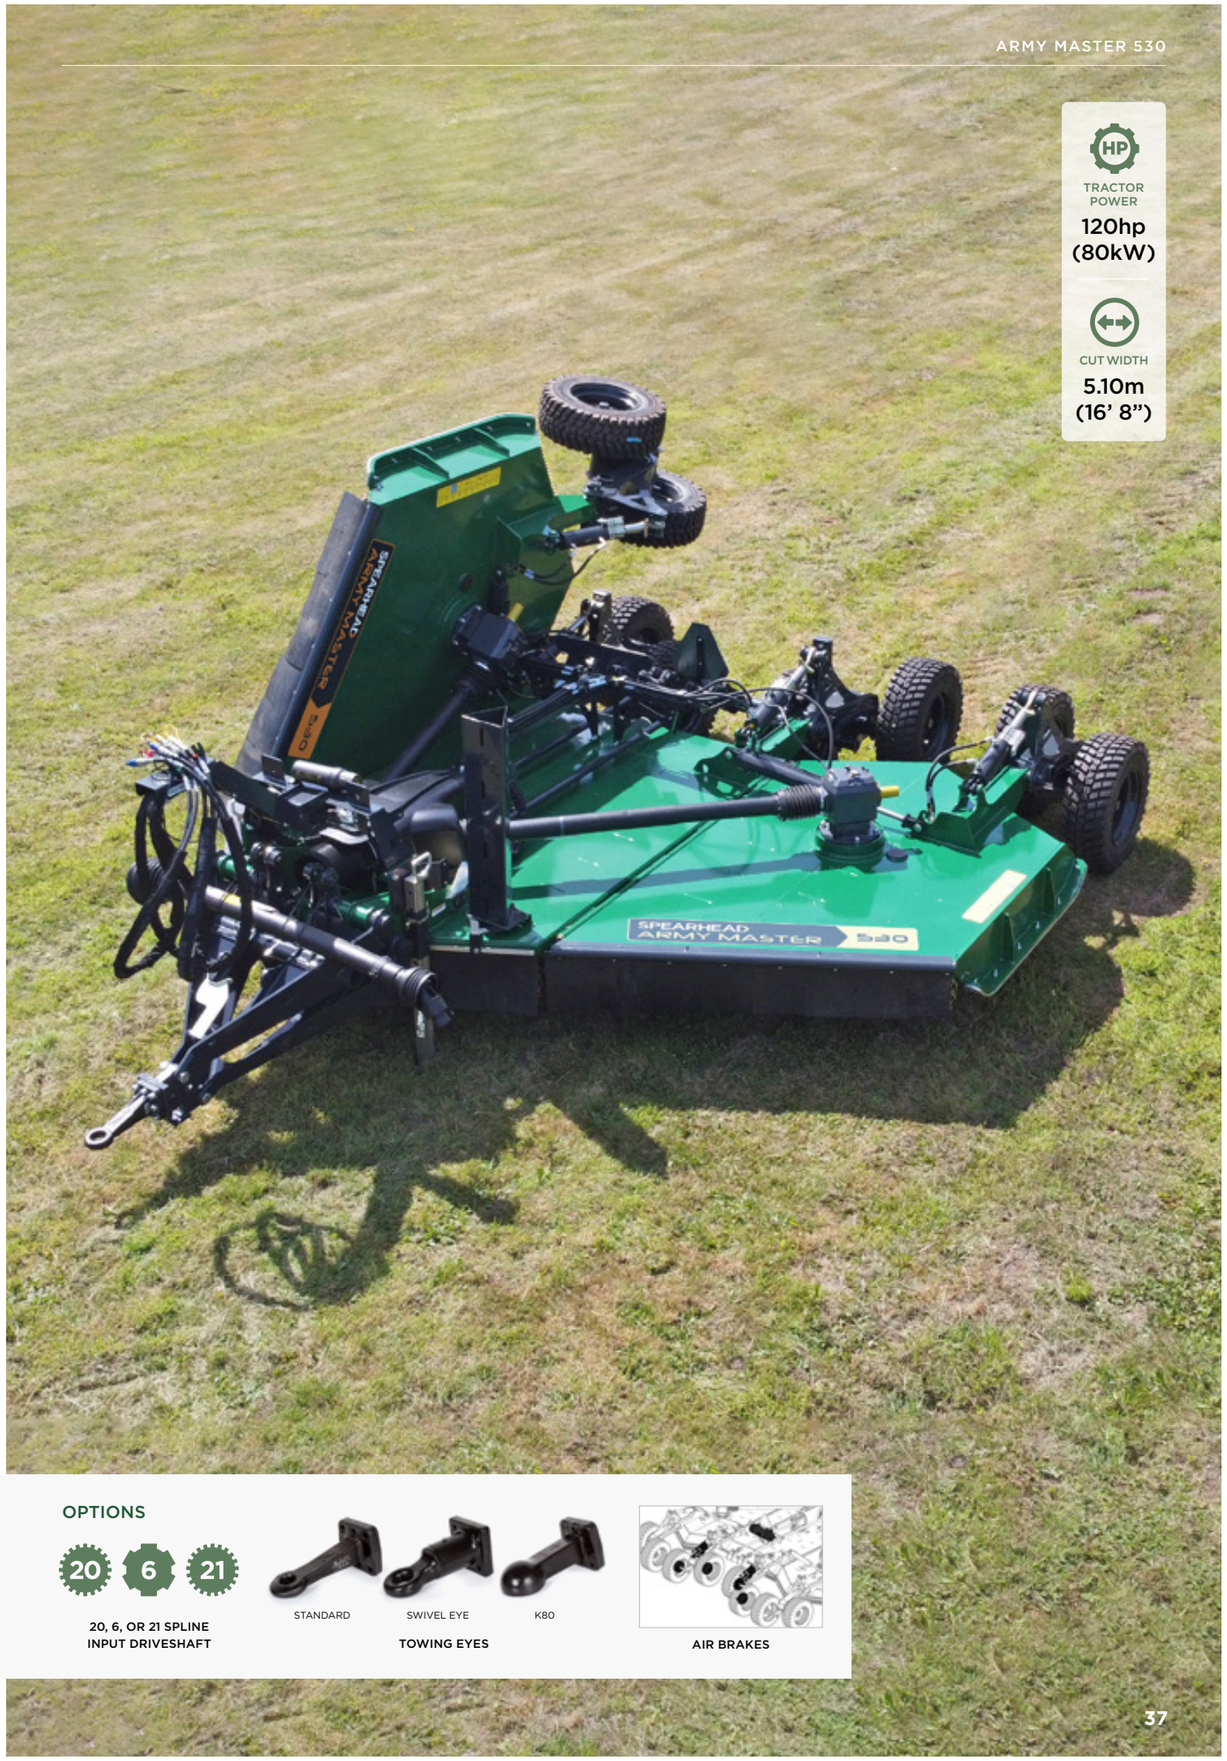

Specifically evolved from the top-end Stubble Master series, Army Master 530 boasts many upgrades. Designed to serve military bases and training sites, it can handle the rough terrain associated with this environment.

The rugged specification includes a 225hp (168kW) driveline and Hardox deck. Meanwhile, super-sized foam-filled wheels and independent lift mean it can go anywhere. Front nudge bars, and a bespoke ‘stump jumper’ blade pan with slashing blades complete the modifications.

- Toughened top-end Stubble Master for military use.
- Capable of severe impact loading.
- Super-sized foam-filled wheels never let you down.
